Divers - "Léonardo Da Vinci's"

At the Hayward Gallery, London, a major exhibition of Leonardo da Vinci's work was sponsored by IBM United Kingdom. The exhibit included many models built from Leonardo's drawings, together with computer graphic sequences developed by the IBM Scientific Center in Winchester - bringing to life some of Leonardo's work on architecture, solid geometry, anatomy and perspective. Drawings in the Queen's Royal collection of Queen Elizabeth II formed the heart of the exhibit.
